

InVentry Visitor Management datasheet

This API integration is compatible with InVentry version 4.11.0 onwards.

InVentry

The InVentry visitor management and sign-in solution is trusted by more than 8,000 schools and businesses around the UK.

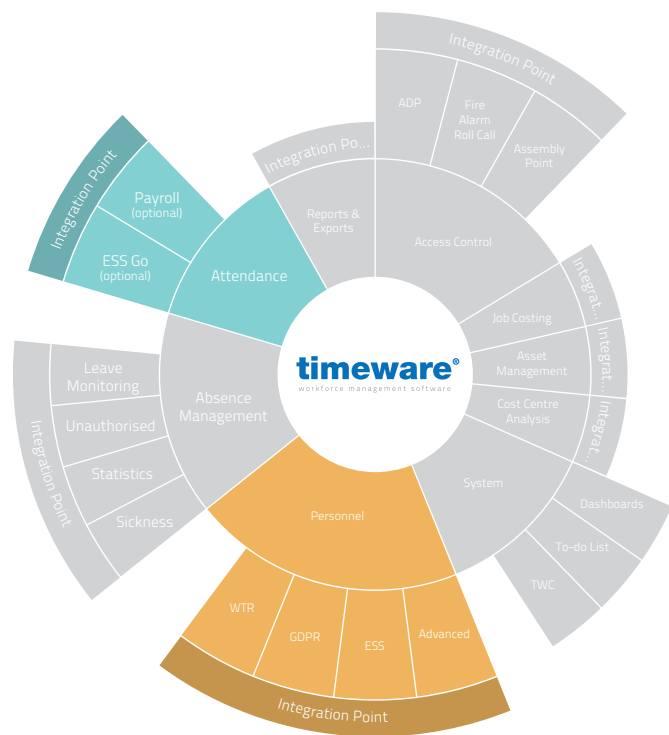

With their HQ based in Gildersome, Leeds and a regional office in Glasgow, InVentry's reach across the Country is assisted by a network of highly skilled and highly trained specialist resellers.

timeware® /InVentry integration overview

timeware® have created an API integration between InVentry and timeware® Small Business and timeware® Professional. This means that InVentry customers requiring a feature rich employee attendance solution can benefit from a software only integration that requires no additional attendance devices.

This integration eliminates 'duplicate entry' enabling Personnel and their associated credentials created in the lead system (InVentry) to be passed directly to timeware®.

An administrator adds a new Personnel record into InVentry and the API integration automatically creates the equivalent Personnel record in the timeware® software. When a person signs in on one of the pre-defined InVentry devices, the API integration automatically transfers the InVentry Event into the timeware® software as an Attendance Booking.
